Re: NOV No. P-2001412-23-2
WL023, Well #24
Moore Public Water Supply
PWSID No. OK2001412
NOV for WL023 First Quarter 2023 Arsenic Concentration (0.014 MG/L)

The well was turned off during the time of the Notification of Violation (NOV) and not being used at this time. We have been waiting for results of a pilot study and approval of a treatment system for arsenic removal. This will be installed at the well and before entrance into the distribution system. If further sampling is needed before the removal system is approved and installed, the well will be sampled going to waste and not at the site of the City of Moore's distribution system. The public notice will be in the June edition of the City of Moore's newsletter which is mailed to all of our customer utility accounts, and it will be posted on the City's website.

If you need more information please contact Steve Rea at 405-313-8054

Thanks,

A handwritten signature in black ink that reads "Brooks Mitchell".

Brooks Mitchell, City Manager
