Are You Covered for Sewer Backups?

Be sure your home owner's insurance policy covers damage due to a sewer backup.

Even if a backup is due to a blocked City main, the City may not be allowed to pay for damages. Under State law, cities are liable for sewer main backup damage only if there has been prior notice and time to fix the problem.

Although City crews can help clean up the immediate mess, home owners, not the city, must pay for replacing carpets, furniture and repairs.

Another sewer backup safeguard is to install a check valve. This simple device keeps wastewater from flowing back up your private line into your home. (Check valves are now required on some newer homes).

Improvements to the City's sanitary sewer system have reduced backups considerably in recent years. That doesn't mean much if it happens in your house.

CALL AHEAD! Call us 24 hours a day at 793-5080 if you have signs of a developing backup. Signs of blockage include: slow draining sinks, wastewater back flow and/or continuous sewage smell

If there's a problem with the City line, we should be able to fix it before sewage backs up into your house. If your private line is blocked, we'll inform you so you can get it fixed.

Carbon Monoxide Safety

Carbon monoxide or CO is a colorless and odorless gas. CO poisoning can occur when a fuel burning appliance or machine, such as a furnace, heater or generator, is not working or vented properly. Breathing in CO at high levels can be fatal. More than 150 people in the U.S. die every year from accidental non-fire-related CO poisoning.

Learn what you can do to protect your family from the dangers of CO.

- Install and maintain CO alarms inside your home to provide early warning of CO.
- Install CO alarms in a central location outside each separate sleeping area and on every level of your home.
- Use portable generators outdoors in well ventilated areas away from all doors, windows and vents.
- Make sure vents for the dryer, furnace, stove and fireplace are clear of snow and other debris.
- Remove vehicles from the garage immediately after starting.

The Station Recreation Center Hours on Saturday, December 31st 8am – 5pm
Closed on Sunday, January 1st
Monday, January 2nd – Open Regular Hours

Monday, January 16th – MLK Day

City Offices Closed

Trash Service not affected

The Station at Central Park – Open Regular Hours

Help Prevent Pet Waste Pollution

Pet waste left on streets, pavement, lawns, and driveways can have a significant impact on our health and the health of our watershed. When not properly disposed of, pet waste can be picked up by Stormwater runoff and distributed into the watershed through storm drains. Upon entering the watershed, disease-causing bacteria and parasites are introduced into the environment increasing the risk of infection and other ailments detrimental to one's health. When left exposed to the water, the waste begins to decompose depleting oxygen levels and increasing the amount of nutrients in the surrounding water. The byproducts emitted in the water during the decomposition of the waste, can cultivate the perfect circumstances for an algae bloom to occur which can be catastrophic to the ecosystem.

There are three simple ways to prevent pet waste from compromising our water quality:

- 1. Use a bag to clean up the waste**
- 2. Dispose of the waste in the trash**
- 3. Tell others to do the same**

For more information call: (405) 793-5089

Upcoming Events
