

Staff & Volunteer Guide: Identifying Rain Barrels with Wide-Overflow Upgrade

Interior:

- Internal 90-degree PVC (1.5") tubing
- On delivery, a corrugated hose and clamp are stored inside the rain barrel

Exterior:

- On delivery, only an external elbow is visible as the hose and clamp are stored inside the rain barrel

Staff & Volunteer Guide: Identifying Rain Barrels with Regular Overflow Option

Interior:

- **Does not include internal PVC tubing, or corrugated hose and clamp**

Exterior:

- **A threaded cap fitting compatible with a standard garden hose**
