

## FY 2019-2020 Fee Changes

As the City of Moore begins the 2019-2020 fiscal year, the fee schedule has been updated for water meters, sewage disposal, building, plumbing, electrical, mechanical and fire construction permits. The fee increases are designed to keep pace with actual costs incurred in providing inspections and utility service.

These fee changes will go into **effect on August 1, 2019**. All applications submitted and approved prior to the effective date will qualify for the old fees. The changes to the fee schedule are listed below. For any questions or concerns, please contact the Inspections Division at 405-793-5051 or [inspections@cityofmoore.com](mailto:inspections@cityofmoore.com).

Commercial ( <i>Water Service - 1 1/2"</i> )	N/A	\$1,500.00
Commercial ( <i>Water Service - 2"</i> )	<del>\$100.00</del>	\$1,750.00
Commercial ( <i>Water Service - 3"</i> )	N/A	\$2,500.00

### NOTES:

- **Bathroom Group** (Plumbing) – A group of fixtures, including or excluding a bidet, consisting of a water closet, lavatory, and bathtub or shower. Such fixtures are located together on the same floor level.
- **Drain** (Plumbing) – Any pipe that carries waste water or water-borne wastes in a building drainage system.
- **Construction Fuel/Gas** – A temporary fuel gas connection where the gas pipe system, furnace set, duct system, furnace flue, filter, windows and doors are set, and combustion air are all installed appropriately and passes all required testing. A letter from the installer identifying the warranty of the unit will not expire due to the operation of the mechanical unit prior to a Certificate of Occupancy being issued will be required. Re-test of the fuel gas system must be performed for the final inspection.

- **Short Set** (Water Meter) – *The public water main is located on the same side of street as the water meter or by-pass tee outlet. The installation set may consist of piping, corporation stops, taps, tapping valves, sleeves, meter or any other public water assembly.*
- **Long Set** (Water Meter) – *The public water main is located on the opposite or from the center of a street side as the water meter or by-pass tee outlet. The installation set may consist of piping, corporation stops, taps, tapping valves, sleeves, meter or any other public water assembly.*
- **Package Unit** (Mechanical) – *An all in one heating and cooling system where space within a structure is limited. The unit is typically in an outdoor setting either on the roof or to the side of a structure.*
