Christmas Tree Safety

As you deck the halls this holiday season, be fire smart. A small fire that spreads to a Christmas tree can quickly grow very large.

- Choose a tree with fresh, green needles that do not fall off when touched
- Before placing the tree in the stand, cut 2" from the base of the trunk.
- Make sure the tree is at least three feet away from any heat source, like fireplaces, radiators, candles, heat vents or lights.
- Make sure the tree is not blocking an exit.
- Add water to the tree stand. Be sure to add water daily.
- Use lights that have the label of an independent testing laboratory. Some lights are only for indoor or outdoor use.
- Replace any string of lights with worn or broken cords or loose bulb connections. Connect no more than three strands of mini string sets and a maximum of 50 bulbs for screw-in bulbs. Read manufacturer's instructions for number of LED strands to connect. Never use lit candles to decorate the tree.
- Always turn off Christmas tree lights before leaving home or going to bed.
- Get rid of the tree after Christmas or when it is dry. Dried out trees are a fire danger and should not be left in the home or garage, or placed outside against the home.
